

EVENT SITE MEASUREMENT

HIGH JUMP

Rule Requirement		
Runway	Length	m
	Does this length include part of the track?	<input type="checkbox"/> YES <input type="checkbox"/> NO
Take-off area	It is level or the inclination complies with the rule	<input type="checkbox"/> YES <input type="checkbox"/> NO
Inclination	The maximum overall inclination in the last 15m of the runway and take-off area is less than 1:167 (0.6%) in the direction of the centre of the crossbar	<input type="checkbox"/> YES <input type="checkbox"/> NO
Notes		

Runway Surface	
See list : https://www.worldathletics.org/about-iaaf/documents/technical-information	
Product name	
Product manufacturer	
Absolute thickness	
World Athletics Product Certificate number	

Event Site – Spot Levels

- Use the diagram to provide the required spot levels at the centre of the take-off and at 15m from the centre of each High Jump take-off.
- It is essential that reduced levels (not grades) be provided on each of the runways.
- The sign convention used by World Athletics for inclinations is that an upward inclination in the direction of running is positive.

Spot Levels – High Jump

Provide runway radial levels at the centre of the take offs (0.000m) and 15m from the centre of each High Jump take off.
